

## **About the Business**

You will notice SpaOLogy is different from the moment you walk in the door. The atmosphere, the aromatherapy, the friendly staff and more make you feel as if you are home. It's so warm and inviting. The staff makes a world of a difference. We have a team that can answer all your questions and take care of your needs. Our staff is going to take care of you like you are our family. Our therapists are masters at what they do. Clients return because of the knowledge and experience of the staff and therapists. We are always willing to work with all our clients, from hosting a party to addressing billing questions. We build and keep relationships with everyone so they know they are important to us. Our clients are the heart of our business, and we value each relationship we build.

All of our staff are licensed and trained in all our spa services. We have staff ranging in experience from 4 years to 25 years in the spa world. Broken Arrow requires our staff to continue our education every year so we are up to speed with all the latest techniques and information.
